

I am using my MacBook with mac OS High Sierra Version 10.13.5

My editor is TextEdit.

A screenshot of a TextEdit window on a Mac. The window has a title bar with three colored buttons (red, yellow, green) and a title "Untitled — Edited". The code is written in C++ and uses a switch statement to handle different suit values. The code is as follows:

```
    cout << "Jack";
    break;
case 12:
    cout << "Queen";
    break;
case 13:
    cout << "King";
    break;
default:
    cout << value;
} // switch
switch (suit)
{
    case 0:
        cout << " of Spades" << endl;
        break;
    case 1:
        cout << " of Hearts" << endl;
        break;
    case 2:
        cout << " of Diamonds" << endl;
        break;
    case 3:
        cout << " of Clubs" << endl;
    } // switch
} // for

} // main
```

I have installed Xcode, and I am going to use its command line tool.

```
hello > hello > main.cpp No Selection
58     case 13:
59         cout << "King";
60         break;
61     default:
62         cout << value;
63 } // switch
64 switch (suit)
65 {
66     case 0:
67         cout << " of Spades" << endl;
68         break;
69     case 1:
70         cout << " of Hearts" << endl;
71         break;
72     case 2:
73         cout << " of Diamonds" << endl;
74         break;
75     case 3:
76         cout << " of Clubs" << endl;
77 } // switch
78 } // for
79
80 } // main
81

Objective: pokerHand.
Programmer: kunming zhu
Editor(s) used: Notepad
Compiler(s) used: TDM MinGW
File: /Users/tom/Desktop/homework/OneDrive - Contra Costa Com
College District/homeworks/COMCS-110-1021/hello/hello/main.cpp
Compiled: Jun 20 2018 at 19:13:33

9 of Clubs
Queen of Diamonds
10 of Diamonds
10 of Clubs
5 of Spades
Program ended with exit code: 0

My working folder is named "COMCS-110-1021." It is my one drive's ghost folder on my MacBook.
